

UNIVERSITÄT HOHENHEIM

The Faculty of Agricultural Sciences invites applications for the position

Full Professor (W3) of “Environmental and Animal Hygiene”

at the Institute of Environmental and Animal Hygiene and Veterinary Medicine (with Animal Clinic).

The successful candidate is expected to teach Environmental and Animal Hygiene for students of both Agricultural Sciences and Biology. Teaching is mainly expected in German, in the international M.Sc. and the Ph.D. programmes the lectures are held in English.

The position requires application of a broad spectrum of methods used in the field of veterinary hygiene especially those for isolation, diagnosis and characterisation of pathogens in solid, liquid matrices and the air. Emphasis should be on research with zoonotic agents of veterinary importance.

This requires relevant experiences and authorization. The spectrum of methods ranges from the application of conventional microbiological and serological techniques to the application of advanced molecular tools in diagnosis and epidemiology. It is expected that the candidate will cooperate with the interdisciplinary scientific centers of the University

Habilitation or comparable scientific qualification as well as educational aptitude is necessary for appointment as a full professor. The University is attempting to increase the number of female scientists and strongly encourages women to apply.

The position is tenured. If it is the individual's first appointment as a professor, the University reserves its right to a probationary employment. In the case of identical qualifications, severely disabled persons are preferred.

Applications including curriculum vitae, documentation of academic achievements and teaching experience, and a list of publications are to be sent to the address below by 15 June, 2009.
